FOLDING TRESTLES

These folding supports are manufactured in Romania, according to the European quality standards and are used in the most diverse domains of activity, domestic as well as professional.

The multi-functional folding supports are made of beech timber or resinous timber, A+B quality class and a moisture content of 12-14%.

The elements are joined through their own plug and hollow, glued together with adhesive, while the metallic accessories are fixed with screws for wood, "butterfly" or "head in cross" types.

The "standard" folding supports type are not varnished, keeping the natural colour of the wood, while the "super" type are delivered dyed, according to customer's desire.

Ref. KWT1500 - WORKING TABLE KIT

These tables are constructed from a pinewood joinery grade timber. Extremely useful in home, garden, buildings or street commerce, this solid set can be folded after use thus occupying very little space for storage. Our set consists of two folding trestles and one table(worktop) made from lamellar wood elements.

The flat top and the lower shelf make the trestle perfect for merchandising a vast range of products. Folding legs provide additional versatility as trestles can be easily stored and brought out when additional space is required. Interior trestle table features folding legs and a lower shelf.

Easy storage and transportation. Unvarnished natural wood. Strong and durable construction. Ready to use. Easy folding and unfolding.

Delivered fully assembled. Supplied flat packed.
